Create and Manage Automated Processes by using Power Automate

Purpose of the training

The training objective is to equip students with the necessary skills and knowledge to create Power Automate cloud flows efficiently, enabling them to automate business processes effectively.

Benefits of completing the training

Completing training offers several valuable benefits for both employees and employers.
By completing this training, you will enhance your ability to create triggers, configure notifications, implement conditional logic, manage approvals, and handle owners and sharing in Power Automate cloud flows.
This will benefit both you and your company as you will become more proficient in automating business processes, improving efficiency, and driving innovation in your organization.

Expected Listener Preparation

- Basic data modeling, user experience design, requirements analysis, and process analysis skills.
- A personal growth mindset and are comfortable using technology to solve business problems.
- An understanding of the operational need and have a vision of the desired outcome. They approach problems with phased and iterative strategies.

Training Language

- Szkolenie: English

- Materiały: English

Training Includes

Training method:
Theory, demo, exercises

Duration

1 days / 7 hours

Training agenda

1. Get started with Power Automate
