E-Learning - Implementing Cisco Collaboration Conferencing 1.0

Cisco - On Demand E-Learning

The Implementing Cisco Collaboration Conferencing (CLCNF) v1.0 course focuses on Cisco on-premises conferencing architecture and solutions.

You will gain knowledge and skills to design and implement common conferencing deployment scenarios of Cisco Meeting Server, its integration with call control features such as Cisco Unified Communications Manager (Cisco Unified CM) and Cisco Expressway, and other Cisco collaboration conferencing devices. This course offers lessons and hands-on labs to help you prepare for the Implementing Cisco Collaboration Conferencing (300-825 CLCNF) exam.

Access Duration: 180 days

Continuing Education Credits: 40

Purpose of the training

- Deployment engineer
- Network engineer
- Sales engineer

Benefits of completing the training

This course will help you:
- Learn how to configure and troubleshoot on-premises conferencing solutions with Cisco Meeting Server.
- Integrate on-premises conferencing solutions with other collaboration components to meet the needs of modern-day workplaces.

Exam description

Certification
Associated Certification: CCNP Collaboration
Associated Exam: 300-825 CLCNF

Expected Listener Preparation

Before taking this course, you should have the following knowledge and skills:
- PC skills
- Addition and management of devices and users in Cisco Unified CM
- SIP signaling fundamentals
- Video endpoint operation and configuration
- Management of media resources in Cisco Unified CM
- Familiarity with Cisco Expressway ideal but not required
- Familiarity with APIs ideal but not required

Recommended Cisco offerings that may help you meet these prerequisites:
- Understanding Cisco Collaboration Foundations (CLFNDU)
- Implementing and Operating Cisco Collaboration Core Technologies (CLCOR)
- Implementing Cisco Collaboration Cloud and Edge Solutions (CLCEI)

Training Language

Lenguage: English
Materials: English

Training Includes

- Labs
- Self-Paced Training
- Video Training

Czas trwania

1 dni / 1 godzin

Training agenda

- Describe the Cisco conferencing architecture including cloud, hybrid, and on-premises conferencing
- Describe the physical deployment options and deployment models for Cisco Meeting Server, including Cisco Meeting Server 1000, 2000, and virtual machine
- Configure a Cisco Meeting Server single combined deployment for Web Real-Time Communication (WebRTC) endpoints within the enterprise
- Use application programming interfaces (APIs) and the Cisco Meeting Server API Guide to configure profiles using Postman and the Webadmin API tool
- Configure a scalable and resilient deployment of Cisco Meeting Server with three servers for WebRTC endpoints within the enterprise
- Configure a scalable and resilient deployment of Cisco Meeting Server to support standard Session Initiation Protocol (SIP) and WebRTC connectivity outside the enterprise
- Configure a scalable and resilient deployment of Cisco Meeting Server to support recording and streaming of conferences
- Configure Cisco Unified Communications Manager and Cisco Meeting Server to support Rendezvous, Scheduled, and Ad-hoc conferencing for Cisco Unified CM registered endpoints
- Configure Cisco Meeting Server to integrate with a preconfigured on-premises Microsoft Skype for Business installation
- Install Cisco TelePresence Management Suite (Cisco TMS) and Cisco TelePresence Management Suite for Microsoft Exchange (Cisco TMSXE) on a single Microsoft Windows 2012 server and connect to an existing Structured Query Language (SQL) environment
- Install and integrate Cisco Meeting Management with Cisco TMS and Cisco Meeting Server
- Set up and manage a scheduled conference with Cisco TMS and Cisco Meeting Management
- Capture and analyze logs from Cisco Meeting Server and Cisco Meeting Manager to diagnose faults, including a

SIP connection error
